APPLIED MATHEMATICS AND COMPUTATION

VOLUME 41

LECH SCHULZ
Set-spectrum Method in Structure Comparison and the Concept of Topological Kinship 1

N. I. IOAKIMIDIS, E. A. PERDIOS, AND K. E. PAPADAKIS
Numerical Estimation of the Coefficient of the Homogeneous Riemann-Hilbert Problem on the Basis of Boundary Data 21

AGNIESZKA BOGOBOWICZ
Theoretical Aspects of Modeling and Control of Water Quality in a River Section 35

BUI DOAN KHANH
A Computation of Fermi-Dirac Integrals by Asymptotics and the Hermite Corrector Formula 61

ERIC KINCANNON
An Orthogonal Set Composed from the Functions e^{nx}, $n \geqslant 0$, $x \leqslant 0$ 69

V. LAKSHMIKANTHAM AND YONG SUN
Applications of Interval Analysis to Minimal and Maximal Solutions of Differential Equations 77

PAUL YIP
Inference on a Fatal Disease 89

R. KALABA AND L. TESFATSION
Solving Nonlinear Equations by Adaptive Homotopy Continuation 99

WILHELM HEINRICHS
A 3D Spectral Multigrid Method 117

A. A. S. Zaghrout and N. El-Dawaliby
Generalizations of Gronwall-Bellman-Reid Inequalities 129

A. I. Ranasinghe and M. H. Chang
Solution of the Burgers Equation on Semiinfinite and Finite Intervals via a Stream Function 145

C. J. Goh and K. L. Teo
Alternative Algorithms for Solving Nonlinear Function and Functional Inequalities 159

Simona Muratori and Sergio Rinaldi
On the Invertibility of Leslie Systems 179

G. Ammar, W. Dayawansa, and C. Martin
Exponential Interpolation: Theory and Numerical Algorithms 189

Kevin G. Kirby, Michael Conrad, and Roberto R. Kampfner
Evolutionary Learning in Reaction-Diffusion Neurons 233
